

## Organic Salmon & Turkey with bok choy & turmeric

Complete food for cats of all ages

**70g**

**Ingredients:** fresh turkey\*(breast meat, neck, carcass, liver) 53%, fresh salmon\* 40%, bok choy\* 2%, minerals 1.5%, kelp 1%, coconut flakes\* 1%, hemp oil\* 1%, turmeric\*, Ascophyllum nodosum\* (pure seaweed extract) \*organic.

**Additives (per kg) Nutritional additives:** vitamin A 1000 IU, vitamin D3 100 IU, ferrous sulphate monohydrate 22 mg, cupric sulphate pentahydrate 1.5 mg, manganous sulphate monohydrate 1.5 mg, zinc oxide 25 mg, sodium selenite 0.1 mg, taurine 1300 mg.

**Analytical Constituents:** protein 12.46%, crude oils & fats 6.4%, crude ash 1.7%, fibre 0.68%, moisture 77.78%. 110 kcal/100 g.

### Ingredients

Turkey

### Description

Turkey is a white meat and a lean protein. It's also an excellent source of many vitamins and minerals, especially B vitamins, selenium, taurine, and zinc.

### Benefits for your pet

Highly digestible, turkey enhances palatability, is low in calories and high in selenium and tryptophan - both essential for the immune system. Protein is important for muscle growth and to support fullness and weight loss. The B Vitamins are responsible for efficient energy levels, red blood cells and amino acid formation.

Salmon

Salmon is a highly digestible and delicious source of protein and of long-chain Omega-3 fatty acids EPA and DHA, as well as B vitamins, potassium, selenium and astaxanthin.

Salmon's protein helps to preserve bone health and prevent muscle loss. Its Omega-3 fatty acids help to give your pet a shiny coat and fur as well as a healthy skin. They also support the immune system and help decrease inflammation and improve joint function and mobility.

Bok Choy

First cultivated in China thousands of years ago, bok choy, also known as Chinese cabbage, belongs to the cruciferous family of vegetables which includes broccoli, kale and cauliflower. Low in calories, bok choy is an excellent source of selenium, vitamin C, vitamin K, vitamin A, folate, calcium, vitamin B6 and selenium.

Bok choy has a high non-dairy calcium content which is fundamental to promote stronger bones and teeth. Vitamin A helps puppies and kittens' eyes develop and vitamin C helps boost your pets' immune system. Selenium plays a crucial role in proper thyroid gland function, cognitive function and cancer prevention. The consumption of cruciferous veggies has also been linked to a decreased risk of cardiovascular disease.

Kelp

Kelp is a large, brown seaweed that grows in nutrient-rich saltwater near coastal fronts. It has the broadest spectrum of trace minerals and vitamins of any plant group in the world. Kelp is one of the richest natural sources of amino acids and also contains iodine, an essential mineral for healthy thyroid function, and iron to support circulation.

Kelp is widely known for its iodine content which helps to support your pet's glandular system and metabolism. Other benefits include helping tissue repair, speeding metabolism (and thus, weight loss), and it also prevents dental plaque and tartar build-up.

Coconut flakes

Coconut is a fruit in the drupes family – inner flesh surrounded by a hard shell. Contrary to most fruits, coconuts provide fat and also contain protein, several minerals and B vitamins.

One of coconuts' main acids is lauric acid which is very helpful in repelling fleas. Their fatty acids have also been shown to help decrease inflammation and alleviate arthritic pain. Antioxidants boost the immune system and eliminate toxins.

Hemp oil

Hemp oil is a nutritional powerhouse that comes from the seeds of the hemp plant. These seeds don't contain the same levels of compounds as the plant itself. It is not psychoactive and has a rich profile of nutrients, essential fatty acids, plant sterols, antioxidants, vitamins and minerals.

Hemp oil has a myriad of benefits. It actively safeguards the nervous system protecting brain cells from toxicity. Hemp oil has also been shown to decrease the production of inflammatory cytokines, thus making your pet's immune system stronger and also helping reduce subsequent pain and anxiety. Furthermore, it is great for the heart, protecting blood vessels from damage and helping reducing heart rate and blood pressure. The use of hemp oil also increases the levels of fatty acids in the skin and helps reduce skin dryness and itching being a major contributor to fighting skin disorders like eczema or dermatitis.

Turmeric

Turmeric is a powder spice that comes from an Asian plant in the ginger family. It's often considered a superfood, and one that can be safely used for your dog and cat food.

Turmeric's active compound is curcumin. Curcumin has antioxidant, anti-inflammatory, antiviral, antibacterial, antifungal and wound healing properties. It is used to help fight diseases like arthritis, diabetes, cancer, liver disease, gastrointestinal issues and more. It also promotes heart and liver health, pain relief and it's a natural detox agent.

Ascophyllum nodosum (pure seaweed extract)

Ascophyllum nodosum, also known as egg-wrack, is a brown seaweed that can grow up to 2 metres long and that can be found mainly in the North Atlantic. It's most notable as a source of micronutrients, including over 60 minerals.

The combination of minerals and trace elements in Ascophyllum nodosum is incredibly useful to promote oral health and to prevent plaque. Its fibre, insoluble and resolute, acts as a brush cleaning up the stomach from bacteria, while also working as an anti-inflammatory.
