

## Cod, buckwheat, cabbage & kelp

Complete food for dogs of all ages and sizes

**100g**

**Ingredients:** fresh cod 82%, buckwheat\* 10%, cabbage\* 5%, salmon oil 1%, minerals 1%, kelp, olive oil\*, caraway seeds\* \*15.6% organic.

**Additives (per kg) Nutritional additives:** vitamin A 2200 IU, vitamin D3 180 IU, vitamin E 12 IU, cupric sulphate pentahydrate 1.6 mg, manganous II oxide 0.9 mg, zinc sulphate monohydrate 15 mg, sodium selenite 0.07 mg

**Analytical Constituents:** protein 11.5%, crude oils & fats 4%, crude ash 1.5%, fibre 0.5%, moisture 78%. 97 kcal/100 g.

Ingredients	Description	Benefits for your pet
Cod	Cod is a nutritious fish, high in protein but low in calories and fat. It's also a reliable source of several B vitamins and provides many important minerals, including phosphorus and selenium.	Cod, as a source of protein, supports the structure and regulation of cells, tissues and organs in your pets' body. Its vitamin content is also very beneficial, especially if we're talking about vitamin B6 (important for metabolic processes and brain function), B12 (essential to help support nerve and blood cells) and vitamin A (to promote good vision and prevent eye diseases).
Buckwheat	Despite its name, buckwheat is not actually related to wheat and, like quinoa and amaranth, belongs to a group of foods called pseudo cereals: seeds consumed as cereal grains but don't grow on grasses. Buckwheat is a highly nutritious source of protein, fibre, complex carbohydrates and energy. Buckwheat does not contain gluten.	Among its health benefits, buckwheat contains minerals and fibre, which helps improve heart health, promote weight loss, while controlling blood sugar levels.
Cabbage	Cabbage is a cruciferous vegetable that belongs to the Brassica genus which includes broccoli, cauliflower and kale. It's a nutritional powerhouse packing in big doses of fibre, folate, potassium, magnesium, vitamins A, C and K, iron and riboflavin. not contain gluten.	Cabbage is antioxidant-rich, which means it can help protect cells from free radicals and by extension it's a great asset in fighting for a strong immune system for your pet. It's also high in fibre – helping the function of the digestive tract.
Salmon oil	Salmon oil, like regular fish oil, is high in Omega-3 fatty acids. The primary Omega-3 fats found in salmon oil are eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA).	Some of the incredible proven benefits from salmon oil to our pets include: improved condition of the skin and coat, reduced inflammation that can lead to conditions like arthritis, helps preventing skin allergies, regulates the immune system, improves cognitive function in older dogs, lowers blood pressure and triglycerides, helps with Inflammatory Bowel Disease, fights heart diseases, reduces the appearance of joint problems. Furthermore, research has shown that DHA also helps in a better brain development in puppies and kittens.
Kelp	Kelp is a large, brown seaweed that grows in nutrient-rich saltwater near coastal fronts. It has the broadest spectrum of trace minerals and vitamins of any plant group in the world. Kelp is one of the richest natural sources of amino acids and also contains iodine, an essential mineral for healthy thyroid function, and iron to support circulation.	Kelp is widely known for its iodine content which helps to support your pet's glandular system and metabolism. Other benefits include helping tissue repair, speeding metabolism (and thus, weight loss), and it also prevents dental plaque and tartar build-up.
Olive oil	Olive oil is a monounsaturated fat and the absolute cornerstone of the Mediterranean diet. Apart from its valuable and healthy fat, it's also loaded with powerful antioxidants.	Olive Oil is a great enhancer of your best friend's diet and health. It contains phytonutrients, vitamin E, and Omega-3 fatty acids that help in keeping your pet's fur and skin well-nourished and also a variety of nutrients that work as a natural boost to the immune system. Other amazing benefits include the prevention of cardiovascular disease, diabetes, cancer and weight gain. Many other studies have also shown its connection to brain and joint health, which is good news for senior pets as well. For cats, constipation is a serious problem, but olive oil is an amazing natural remedy since it has a laxative effect.
Caraway seeds	Curiously enough, caraway seeds are not really seeds at all since they're the dried fruit of the caraway plant, a flowering plant of the Apiaceae family. Caraway seeds are loaded with fibre and minerals including iron, magnesium, copper, and calcium while also being a great source of antioxidants.	Caraway seeds' antioxidant profile makes it an important addition to fight diseases. They're considered a warming herb, which means that they help the body to stay warm. Caraway seeds are also good for maintaining muscle health and help prevent constipation.
