

Organic Chicken with pumpkin, courgette & blessed thistle

Complete food for dogs of all ages and sizes

100g

Ingredients: Fresh chicken* (breast meat, neck, carcass, liver) 86%, Hokkaido pumpkin* 5%, courgette* 5%, chia seeds* 1.5%, minerals 1%, coconut oil*, cod liver oil, blessed thistle*, Ascophyllum nodosum* (pure seaweed extract) *organic.

Additives (per kg) Nutritional additives: vitamin A 2200 IU, vitamin D3 180 IU, vitamin E 12 IU, cupric sulphate pentahydrate 1.6 mg, manganous II oxide 0.9 mg, zinc sulphate monohydrate 15 mg, sodium selenite 0.07 mg.

Analytical Constituents: protein 11.33%, crude oils & fats 6.1%, crude ash 1.7%, fibre 1.2%, moisture 79%. 109 kcal/100 g.

Ingredients	Description	Benefits for your pet
Chicken	Chicken is a highly digestible and palatable protein. It's considered lean meat (extremely low-fat) and is high in B3 and B6 vitamins, phosphorus and selenium.	Since it's a low-fat source of protein, chicken is excellent to support weight loss or an ideal weight for your pet. Chicken is also a good source of glucosamine and essential amino acids, which makes it great for bone health and lean muscle development.
Hokkaido pumpkin	Hokkaido pumpkin, also known as red kuri squash, is rich in vitamins and contains minerals such as calcium, magnesium, phosphorus, potassium, beta-carotene and vitamins A, B and C. It has a low energy content, and it's high in fibre and has a detoxifying effect.	Hokkaido pumpkin has a range of benefits, including being one of the best sources of beta carotene – a powerful antioxidant that is converted into vitamin A which can help boost your pets' immune system. It's also a source of fibre, which helps suppress appetite and promote weight loss. Pumpkin also helps to regulate your pets' digestive system, in both constipation issues and diarrhoea episodes.
Courgette	Courgette is a very popular vegetable and a common type of summer squash. It is a rich source of vitamin C, potassium, magnesium, vitamin A and some of the B vitamins.	Courgette's high content of vitamin C provides antioxidants that have an anti-inflammatory role in your pets' body. It also contains the phytonutrients lutein and zeaxanthin, associated with healthy eyesight. Courgette is also touted for its weight loss benefits. Lastly, it is high in potassium, folate, and vitamin A, all necessary for healthy muscles and a good hydration level.
Chia	Chia is an edible seed from the desert plant <i>Salvia hispanica</i> , grown originally in Mexico. Actually, the meaning behind its name is quite enlightening as to its beneficial properties: it means "strength". Chia is an energy booster and contains healthy Omega-3 fatty acids, carbohydrates, protein, fibre, antioxidants, and calcium. Chia seeds are also hydrophilic: they contain a high amount of mucilage that allows them to absorb water and form a gel in the stomach that slows down the conversion of carbohydrates into sugar.	Chia's high protein profile makes them essential for tissue & muscle building functions and it also has a reducing effect on the appetite, which is incredibly beneficial for overweight pets. Since they're highly absorbent, they also help in keeping their body hydrated as well. Chia is also very rich in Omega-3 which helps repair damaged tissue and restore flexibility in the cell membranes, and also promotes heart health, efficient digestion, and bone strength.
Coconut oil	Coconut oil is extracted from mature coconuts and takes the form of an edible oil that can and should be used in human and pet food. It is a source of saturated fatty acids, most of which are Medium Chain Triglycerides (MCTs).	In addition to being an excellent energy source, coconut oil has also been shown to improve skin and coat, improve digestion and reduce skin conditions and allergic reactions. Furthermore, its fatty acids are incredibly helpful in cognitive function. According to many studies, coconut oil may also be beneficial for preventing pest infections and for treating bites.
Cod liver oil	Cod liver oil is a well-regarded supplement and ingredient because it contains high levels of EPA and DHA, and also of vitamins A and D.	Cod liver oil is packed with Omega-3 fatty acids that help reduce inflammation in the body – which is a main cause of conditions like heart disease, arthritis and skin-related issues. Like other similar natural fat supplements, it promotes a shiny and healthy coat and reduces shedding considerably.
Blessed thistle	Blessed thistle is a plant member of the Aster family, Asteraceae, native to the Mediterranean.	Blessed thistle contains tannin – a kind of polyphenolic biomolecule – that can help with intestine health and fight inflammation. It also supports digestion by stimulating secretions of gastric juices and saliva.
Ascophyllum nodosum (pure seaweed extract)	Ascophyllum nodosum, also known as egg-wrack, is a brown seaweed that can grow up to 2 metres long and that can be found mainly in the North Atlantic. It's most notable as a source of micronutrients, including over 60 minerals.	The combination of minerals and trace elements in Ascophyllum nodosum is incredibly useful to promote oral health and to prevent plaque. Its fibre, insoluble and resolute, acts as a brush cleaning up the stomach from bacteria, while also working as an anti-inflammatory.
