

Organic Chicken with pumpkin, courgette & blessed thistle

Complete food for cats of all ages

70g

Ingredients: Fresh chicken* (breast meat, neck, carcass, liver) 92%, Hokkaido pumpkin* 2%, courgette* 2%, minerals 1.5%, coconut flakes* 1%, hemp oil* 1%, blessed thistle*, Ascophyllum nodosum* (pure seaweed extract) *organic.

Additives (per kg) Nutritional additives: vitamin A 1000 IU, vitamin D3 100 IU, ferrous sulphate monohydrate 22 mg, cupric sulphate pentahydrate 1.5 mg, manganous sulphate monohydrate 1.5 mg, zinc oxide 25 mg, sodium selenite 0.1 mg, taurine 1300 mg.

Analytical Constituents: protein 11%, crude oils & fats 8.3%, crude ash 1.5%, fibre 0.9%, moisture 76.9%. 112 kcal/100 g.

Ingredients	Description	Benefits for your pet
Chicken	Chicken is a highly digestible and palatable protein. It's considered lean meat (extremely low-fat) and is high in B3 and B6 vitamins, phosphorus and selenium.	Since it's a low-fat source of protein, chicken is excellent to support weight loss or an ideal weight for your pet. Chicken is also a good source of glucosamine and essential amino acids, which makes it great for bone health and lean muscle development.
Hokkaido pumpkin	Hokkaido pumpkin, also known as red kuri squash, is rich in vitamins and contains minerals such as calcium, magnesium, phosphorus, potassium, beta-carotene and vitamins A, B and C. It has a low energy content, and it's high in fibre and has a detoxifying effect.	Hokkaido pumpkin has a range of benefits, including being one of the best sources of beta carotene – a powerful antioxidant that is converted into vitamin A which can help boost your pets' immune system. It's also a source of fibre, which helps suppress appetite and promote weight loss. Pumpkin also helps to regulate your pets' digestive system, in both constipation issues and diarrhoea episodes.
Courgette	Courgette is a very popular vegetable and a common type of summer squash. It is a rich source of vitamin C, potassium, magnesium, vitamin A and some of the B vitamins.	Courgette's high content of vitamin C provides antioxidants that have an anti-inflammatory role in your pets' body. It also contains the phytonutrients lutein and zeaxanthin, associated with healthy eyesight. Courgette is also touted for its weight loss benefits. Lastly, it is high in potassium, folate, and vitamin A, all necessary for healthy muscles and a good hydration level.
Coconut flakes	Coconut is a fruit in the drupes family – inner flesh surrounded by a hard shell. Contrary to most fruits, coconuts provide fat and also contain protein, several minerals and B vitamins.	One of coconuts' main acids is lauric acid which is very helpful in repelling fleas. Their fatty acids have also been shown to help decrease inflammation and alleviate arthritic pain. Antioxidants boost the immune system and eliminate toxins.
Hemp oil	Hemp oil is a nutritional powerhouse that comes from the seeds of the hemp plant. These seeds don't contain the same levels of compounds as the plant itself. It is not psychoactive and has a rich profile of nutrients, essential fatty acids, plant sterols, antioxidants, vitamins and minerals.	Hemp oil has a myriad of benefits. It actively safeguards the nervous system protecting brain cells from toxicity. Hemp oil has also been shown to decrease the production of inflammatory cytokines, thus making your pet's immune system stronger and also helping reduce subsequent pain and anxiety. Furthermore, it is great for the heart, protecting blood vessels from damage and helping reducing heart rate and blood pressure. The use of hemp oil also increases the levels of fatty acids in the skin and helps reduce skin dryness and itching being a major contributor to fighting skin disorders like eczema or dermatitis.
Blessed thistle	Blessed thistle is a plant member of the Aster family, Asteraceae, native to the Mediterranean.	Blessed thistle contains tannin – a kind of polyphenolic biomolecule – that can help with intestine health and fight inflammation. It also supports digestion by stimulating secretions of gastric juices and saliva.
Ascophyllum nodosum (pure seaweed extract)	Ascophyllum nodosum, also known as egg-wrack, is a brown seaweed that can grow up to 2 metres long and that can be found mainly in the North Atlantic. It's most notable as a source of micronutrients, including over 60 minerals.	The combination of minerals and trace elements in Ascophyllum nodosum is incredibly useful to promote oral health and to prevent plaque. Its fibre, insoluble and resolute, acts as a brush cleaning up the stomach from bacteria, while also working as an anti-inflammatory.
