

Organic Salmon & Turkey with quinoa, swiss chard & turmeric

Complete and balanced raw food for dogs of all ages and sizes.

Ingredients: turkey* (breast, carcass) 41.87%, salmon* 40.13%, quinoa* 10%, swiss chard* 5%, minerals 1%, ascophyllum nodosum* (pure seaweed extract), coconut oil*, cod liver oil, turmeric* *organic.

Additives (per kg) Nutritional additives: vitamin D3 200 IU, vitamin E/all rac-alpha-tocopheryl acetate 40 mg, manganese 2.4 mg, zinc 20 mg.

Analytical Constituents: protein 14.66%, crude oils & fats 13.34%, crude ash 2.23%, fibre 1.19%, moisture 67.5%. 168 kcal/100 g.

Ingredients	Description	Benefits for your pet
Turkey	Turkey is a white meat and a lean protein. It's also an excellent source of many vitamins and minerals, especially B vitamins, selenium, taurine, and zinc.	Highly digestible, turkey enhances palatability, is low in calories and high in selenium and tryptophan - both essential for the immune system. Protein is important for muscle growth and to support fullness and weight loss. The B Vitamins are responsible for efficient energy levels, red blood cells and amino acid formation.
Salmon	Salmon is a highly digestible and delicious source of protein and of long-chain Omega-3 fatty acids EPA and DHA, as well as B vitamins, potassium, selenium and astaxanthin.	Salmon's protein helps to preserve bone health and prevent muscle loss. Its omega-3 fatty acids help to give your pet a shiny coat and fur as well as a healthy skin. They also support the immune system and help decrease inflammation and improve joint function and mobility.
Quinoa	Being one of the world's most popular health foods, Quinoa is incredibly nutritious. It's a seed related to spinach and absolutely gluten-free. It contains high levels of protein and vitamins B1, B2, and B6 and E, while also providing magnesium, phosphate, iron, calcium, potassium and various beneficial antioxidants to your pet.	It has hypoallergenic properties and high digestibility and is an excellent energy source. With anti-inflammatory and antioxidant properties, quinoa is also a key-player in maintaining your pet's health of the digestive tract and is ideal for dogs or cats with digestive issues or food intolerances.
Swiss Chard	This vegetable is truly one of the most nutritious, yet still underestimated in many ways. It may not be a very popular vegetable, but it has many positive benefits for your dog.	Swiss chard is full of Vitamins A, K and C, as well as fibre. These vitamins support health in the eye, blood, liver, colon and immune system, helping strengthen the body against external threats. Vitamin A also contributes to the improvement of eyesight, hair, skin and nails of our four-legged friends. It assists in the production of enzymes, hormones and a number of substances important to the body. Swiss chard also contains high percentages of minerals such as potassium, magnesium, iodine, sodium, iron and calcium which are all ideal in complimenting a carnivore's diet. Potassium is needed for your dog's nervous system and muscles, magnesium helps with the digestive system, nerves and muscles, and iodine is needed for the thyroid, a hormonal gland with very important functions at the metabolic level.
Ascophyllum nodosum (pure seaweed extract)	Ascophyllum nodosum, also known as egg-wrack, is a brown seaweed that can grow up to 2 metres long and that can be found mainly in the North Atlantic. It's most notable as a source of micronutrients, including over 60 minerals.	The combination of minerals and trace elements in Ascophyllum nodosum is incredibly useful to promote oral health and to prevent plaque. Its fibre, insoluble and resolute, acts as a brush cleaning up the stomach from bacteria, while also working as an anti-inflammatory.
Coconut oil	Coconut oil is extracted from mature coconuts and takes the form of an edible oil that can and should be used in human and pet food. It is a source of saturated fatty acids, most of which are Medium Chain Triglycerides (MCTs).	In addition to being an excellent energy source, coconut oil has also been shown to improve skin and coat, improve digestion and reduce skin conditions and allergic reactions. Furthermore, its fatty acids are incredibly helpful in cognitive function. According to many studies, coconut oil may also be beneficial for preventing pest infections and for treating bites.
Cod liver oil	Cod liver oil is a well-regarded supplement and ingredient because it contains high levels of EPA and DHA, and also of vitamins A and D.	Cod liver oil is packed with Omega-3 fatty acids that help reduce inflammation in the body – which is a main cause of conditions like heart disease, arthritis and skin-related issues. Like other similar natural fat supplements, it promotes a shiny and healthy coat and reduces shedding considerably.
Turmeric	Turmeric is a powder spice that comes from an Asian plant in the ginger family. It's often considered a superfood, and one that can be safely used for your dog and cat food.	Turmeric's active compound is curcumin. Curcumin has antioxidant, anti-inflammatory, antiviral, antibacterial, antifungal and wound healing properties. It is used to help fight diseases like arthritis, diabetes, cancer, liver disease, gastrointestinal issues and more. It also promotes heart and liver health, pain relief and it's a natural detox agent.
