

Goat, pumpkin, courgette & spirulina

Complete food for dogs of all ages and sizes

400g

Ingredients: free-range fresh goat (muscle meat, heart, lungs, liver) 79%, Hokkaido pumpkin* 10%, courgette* 8%, minerals 1%, spirulina*, coconut oil*, salmon oil, algae limestone, Ascophyllum nodosum* (pure seaweed extract) *19% organic.

Additives (per kg) Nutritional additives: vitamin A 2200 IU, vitamin D3 180 IU, vitamin E 12 IU, cupric sulphate pentahydrate 1.6 mg, manganous II oxide 0.9 mg, zinc sulphate monohydrate 15 mg, sodium selenite 0.07 mg.

Analytical Constituents: protein 12%, crude oils & fats 5.1%, crude ash 1.6%, fibre 0.5%, moisture 79%. 102 kcal/100 g.

Ingredients	Description	Benefits for your pet
Goat	Goat meat is a lean, healthy protein that's rich in vitamins and minerals that include vitamins B6, B12, C, E, A, K, iron, calcium, phosphorus, zinc, copper, manganese, selenium, potassium, sodium and more. It's lower in fat and cholesterol than chicken and lower in calories than beef, lamb and pork.	Goat meat is an astoundingly reliable source of vital minerals and vitamins that act as immunity boosters. It's low in calories and its vitamin B content helps burning fat. Goat meat is high in iron (essential for synthesis of blood), potassium (it stabilises the heart) and its low sodium helps in stabilising blood pressure.
Hokkaido pumpkin	Hokkaido pumpkin, also known as red kuri squash, is rich in vitamins and contains minerals such as calcium, magnesium, phosphorus, potassium, beta-carotene and vitamins A, B and C. It has a low energy content, and it's high in fibre and has a detoxifying effect.	Hokkaido pumpkin has a range of benefits, including being one of the best sources of beta carotene – a powerful antioxidant that is converted into vitamin A which can help boost your pets' immune system. It's also a source of fibre, which helps suppress appetite and promote weight loss. Pumpkin also helps to regulate your pets' digestive system, in both constipation issues and diarrhoea episodes.
Courgette	Courgette is a very popular vegetable and a common type of summer squash. It is a rich source of vitamin C, potassium, magnesium, vitamin A and some of the B vitamins.	Courgette's high content of vitamin C provides antioxidants that have an anti-inflammatory role in your pets' body. It also contains the phytonutrients lutein and zeaxanthin, associated with healthy eyesight. Courgette is also touted for its weight loss benefits. Lastly, it is high in potassium, folate, and vitamin A, all necessary for healthy muscles and a good hydration level.
Spirulina	Spirulina is an effective natural detoxifier and classified as a blue-green algae or a cyanobacteria. It's one of the oldest and most popular health supplements in the world, a source of protein and also of beta-carotene, polysaccharides, minerals and essential fatty acids.	Spirulina strengthens the immune system since it enhances the body's cellular communication process and its ability to repair DNA. It is also useful in suppressing bad bacteria (like e-coli or Candida yeast), promoting gastrointestinal health and aiding in detoxification and Natural Cleansing of your pet.
Coconut oil	Coconut oil is extracted from mature coconuts and takes the form of an edible oil that can and should be used in human and pet food. It is a source of saturated fatty acids, most of which are Medium Chain Triglycerides (MCTs).	In addition to being an excellent energy source, coconut oil has also been shown to improve skin and coat, improve digestion and reduce skin conditions and allergic reactions. Furthermore, its fatty acids are incredibly helpful in cognitive function. According to many studies, coconut oil may also be beneficial for preventing pest infections and for treating bites.
Salmon oil	Salmon oil, like regular fish oil, is high in Omega-3 fatty acids. The primary Omega-3 fats found in salmon oil are eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA).	Some of the incredible proven benefits from salmon oil to our pets include: Improved condition of the skin and coat, reduced inflammation that can lead to conditions like arthritis, helps preventing skin allergies, regulates the immune system, improves cognitive function in older dogs, lowers blood pressure and triglycerides, helps with Inflammatory Bowel Disease, fights heart diseases, reduces the appearance of joint problems. Furthermore, research has shown that DHA also helps in a better brain development in puppies and kittens.
Algae limestone	Algae limestone is a blue green algae that is particularly associated with limestone, coral and other calcium-carbonate-based rocks. Furthermore, it contains protein and vitamin C.	Algae limestone is a natural source of calcium that cats and dogs are more capable of readily processing than artificially produced calcium citrate. In addition to calcium, it also contains magnesium and 72 other trace elements. Its unique mineral matrix supports the effects of calcium. It stimulates bone growth by remodeling and improving its mineral density, protecting bones by preventing calcium loss, thereby helping against degenerative bone conditions.
Ascophyllum nodosum (pure seaweed extract)	Ascophyllum nodosum, also known as egg-wrack, is a brown seaweed that can grow up to 2 meters long and that can be found mainly in the North Atlantic. It's most notable as a source of micro-nutrients, including over 60 minerals.	The combination of minerals and trace elements in Ascophyllum nodosum is incredibly useful to promote oral health and to prevent plaque. Its fibre, insoluble and resolute, acts as a brush cleaning up the stomach from bacteria, also working as an anti-inflammatory.
